

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

called as consulting physician. He was a thorough student of medicine and surgery, and scientific subjects, and made a specialty of microscopy. He owned a very fine microscope, and devoted much time and study to its use. * * * * *

Respectfully yours,

NANNIE L. SACKRIDER.

D. C. HAWXHURST, M. D., died in Paris, France, February 16th, 1882, at about forty years of age. He became a member of the Society at the Indianapolis meeting. Dr. Hawxhurst had been for some years a dentist at Battle Creek, Mich. In 1877 he received the degree of Doctor of Medicine from the University of Michigan. He was married but a short time before his death, and was with his bride in Paris, where he was studying ophthalmology and otology, expecting to practice as a specialist on his return home. He was an active member of Local and State Medical and Microscopical Societies.

EDWARD B. SCHICKEL was born in Buffalo, N. Y., January 27th, 1848, and died in that city February 17th, 1882. He joined the Society at the Buffalo meeting. He was a member of the Buffalo Microscopical Club, and by occupation a practical chemist.
